Repeated Substring Pattern:-

Code:-

```
import java.io.*;
import java.util.*;
class Solution {
    public static boolean repeatedSubstringPattern(String s) {
        int n = s.length();
        for (int len = 1; len <= n / 2; len++) {
            if (n % len == 0) {
                String sub = s.substring(0, len);
                StringBuilder result = new StringBuilder();
                for (int i = 0; i < n / len; i++) {
                    result.append(sub);
                }
                if (result.toString().equals(s)) {
                    return true;
                }
            }
        }
        return false;
    }
    public static void main(String[] args) throws IOException {
        BufferedReader br =
            new BufferedReader(new InputStreamReader(System.in));
        String s = br.readLine();
        System.out.println(repeatedSubstringPattern(s));
    }
}
```
