Find the Index of the First Occurrence in a String:-

Code:-

```
import java.io.*;

class Solution {

    public static int strStr(String haystack, String needle) {

        int n = haystack.length();

        int m = needle.length();

        for (int i = 0; i <= n - m; i++) {

            int j = 0;

            while (j < m && haystack.charAt(i + j) == needle.charAt(j)) {

                j++;

            }

            if (j == m) {

                return i;

            }

        }

        return -1;

    }

    public static void main(String[] args) throws IOException {

        BufferedReader br =

            new BufferedReader(new InputStreamReader(System.in));

        String haystack = br.readLine();

        String needle = br.readLine();

        System.out.println(strStr(haystack, needle));

    }

}
```
