

Time Conversion:-

Code:-

```
import java.io.*;
import java.math.*;
import java.security.*;
import java.text.*;
import java.util.*;
import java.util.concurrent.*;
import java.util.function.*;
import java.util.regex.*;
import java.util.stream.*;
import static java.util.stream.Collectors.joining;
import static java.util.stream.Collectors.toList;
class Result {
    public static String timeConversion(String s) {
        int hour = Integer.parseInt(s.substring(0, 2));
        String ampm = s.substring(8, 10);
        if (ampm.equals("AM")) {
            if (hour == 12) {
                hour = 0;
            }
        } else {
            if (hour != 12) {
                hour += 12;
            }
        }
        return String.format("%02d", hour) + s.substring(2, 8);
    }
}
public class Solution {
    public static void main(String[] args) throws IOException {
        BufferedReader bufferedReader = new BufferedReader(new InputStreamReader(System.in));
        BufferedWriter bufferedWriter = new BufferedWriter(new
        FileWriter(System.getenv("OUTPUT_PATH")));

        String s = bufferedReader.readLine();

        String result = Result.timeConversion(s);
        bufferedWriter.write(result);
        bufferedWriter.newLine();
        bufferedReader.close();
        bufferedWriter.close();
    }
}
```

Output:-

✓ **Test case 0**

✓ Test case 1 

✓ Test case 2 

✓ Test case 3 

✓ Test case 4 

✓ Test case 5 

✓ Test case 6 

Compiler Message

Success

Input (stdin)

1 **07:05:45PM**

Expected Output

1 **19:05:45**

Move Zeros:-

Code:-

```
class Solution {  
    public void moveZeroes(int[] nums) {  
        int index=0;  
        for(int i=0;i<nums.length;i++){  
            if(nums[i]!=0){  
                nums[index]=nums[i];  
                index++;  
            }  
        }  
        while(index<nums.length){  
            nums[index]=0;  
            index++;  
        }  
    }  
}
```

Output:-

The screenshot displays the LeetCode submission interface for the 'Move Zeros' problem. The left sidebar shows the problem status as 'Accepted' with 75/75 testcases passed, submitted by 'tameem_shaik_' on Sep 18, 2026 at 11:25. A promotional banner for 'School's in. Let's on.' is visible. The runtime statistics show 2 ms and 91.68% beats. The memory usage is 47.66 MB with 75.94% beats. A bar chart shows the runtime distribution. The main area displays the Java code for the 'moveZeroes' method. The test results section shows 'Accepted' with a runtime of 0 ms. Two test cases are listed: Case 1 and Case 2, both of which are passed. The input for Case 1 is 'nums = [0,1,0,3,12]' and the output is '[1,3,12,0,0]'. The expected output is '[1,3,12,0,0]'. A 'Contribute a testcase' button is at the bottom right.

Accepted 75 / 75 testcases passed
