

String to Integer (atoi):-

Code:-

```
class Solution {
    public int myAtoi(String s) {
        int i = 0;
        int n = s.length();
        while (i < n && s.charAt(i) == ' ') {
            i++;
        }
        if (i >= n) {
            return 0;
        }
        int sign = 1;
        if (s.charAt(i) == '+' || s.charAt(i) == '-') {
            sign = (s.charAt(i) == '-') ? -1 : 1;
            i++;
        }
        long result = 0;
        while (i < n && Character.isDigit(s.charAt(i))) {
            int digit = s.charAt(i) - '0';
            result = result * 10 + digit;
            if (sign * result >= Integer.MAX_VALUE) {
                return Integer.MAX_VALUE;
            }
            if (sign * result <= Integer.MIN_VALUE) {
                return Integer.MIN_VALUE;
            }
            i++;
        }
        return (int) (sign * result);
    }
}
```
